3. Medicare Principles & Commitments

Explanatory Note:

The Medicare Principles focus on the provision of public hospital services to eligible persons, but operate in an environment where eligible persons have the right to choose private health care in public and private hospitals supported by private health insurance.

3.1 It is a condition of a grant of financial assistance under this Agreement that the State, in providing public hospital services, agrees to give effect to the Medicare Principles and to undertake the Commitments which are as follows:

Choices of services

Principle 1: Eligible persons must be given the choice to receive public hospital services free of charge as public patients.

Explanatory Note 1: Hospital services include in-patient, out-patient, emergency services (including primary care where appropriate) and day patient services consistent with currently acceptable medical and health service standards.

Explanatory Note 2: At the time of admission to a hospital, or as soon as practicable after that, an eligible person will be required to elect or confirm whether he or she wishes to be treated as a public or private patient.

Explanatory Note 3: Public hospital services do not include those services for which charges may be made as set out in subclause 10.4.

Universality of services

Principle 2: Access to public hospital services is to be on the basis of clinical need.

Explanatory Note 1: None of the following factors are to be a determinant of an eligible person's priority for receiving hospital services:

whether or not an eligible person has health insurance;

an eligible person's financial status or place of residence;

whether or not an eligible person intends to elect or elects to be treated as a public or private patient.

Explanatory Note 2: This principle applies equally to waiting times for elective surgery.

Explanatory Note 3: The phrase ***waiting times*** means waiting times for access to elective surgery from a hospital waiting or booking list.

Equity in service provision

Principle 3: **To the maximum practicable extent, a State will ensure the provision of public hospital services equitably to all eligible persons, regardless of their geographical location.**

Explanatory Note 1: This principle does not require a local hospital to be equipped to provide eligible persons with every hospital service they may need.

Explanatory Note 2: In rural and remote areas, a State should ensure provision of reasonable public access to a basic range of hospital services which are in accord with clinical practices.

Explanatory Note 3: To the extent practicable, hospital services should be available at all recognised hospitals, however, where this is not possible, the State accepts responsibility for referring or transferring the eligible person to where the necessary hospital services are available.

Information about service provision

Commitment 1: **The Commonwealth and a State must make available information on the public hospital services eligible persons can expect to receive as public patients.**

Explanatory Note 1: The joint Commonwealth/State development of a Public Patients' Hospital Charter will be a vehicle for the public dissemination of this information.

Explanatory Note 2: The Public Patients' Hospital Charter will set out the public hospital services available to public patients.

Efficiency and quality in service provision

Commitment 2: **The Commonwealth and the States are committed to making improvements in the efficiency, effectiveness and quality of hospital service delivery.**

Explanatory Note: This includes a commitment to quality improvement, outcome measurement, management efficiency and effort to integrate the delivery of hospital and other health and community services.

3.2 The State agrees to adopt the Medicare Principles and Commitments by enacting legislation establishing the Medicare Principles and Commitments as guidelines that will govern the delivery of public hospital services to eligible persons in the State by 1 January 1994 or, where that is not possible, to make reasonable efforts to adopt the Medicare Principles and Commitments by enacting legislation by that date. In this context, reasonable efforts to adopt the Medicare Principles and Commitments means the introduction of a Bill the aim of which is to establish the Medicare Principles and Commitments as guidelines that will govern the delivery of public hospital services to eligible persons in the State, and the pursuit of its passage.
