LAKE EYRE BASIN INTERGOVERNMENTAL AGREEMENT

AN AGREEMENT MADE THE 21ST DAY OF OCTOBER 2000

BETWEEN:

THE COMMONWEALTH OF AUSTRALIA

AND

THE STATE OF QUEENSLAND

AND

THE STATE OF SOUTH AUSTRALIA

RECITALS:

- A.** The Lake Eyre Basin has within its boundaries areas of national and international ecological and environmental significance, areas of high economic worth from activities such as pastoralism, tourism, oil and gas extraction and mining, and areas of social, cultural and heritage value, the sustainability of much of which depends upon the continued health of the Thomson/Barcoo/Cooper, Georgina and Diamantina river systems within Queensland and South Australia (as defined in the Australian National Map Drainage Divisions and Basins and including their catchments, flood plains, lakes, wetlands and overflow channels).
- B.** Management of the Lake Eyre Basin which will best serve the object of sustainability requires a joint cooperative approach between the States of Queensland and South Australia and the Commonwealth.
- C.** The Parties to this Agreement entered into a Heads of Agreement dated 26 May 1997 whereby it was agreed that the above approach should be embodied in a formal interstate Agreement ratified by the Parliaments of each State.
- D.** This Agreement is entered into by the Parties in accordance with the Lake Eyre Basin Heads of Agreement, and is to provide for the establishment of arrangements for the management of water and related natural resources for that portion of the Lake Eyre Basin identified as the Lake Eyre Basin Agreement Area in Clause 1.1, including the development or adoption, and implementation of agreed Policies and Strategies for the avoidance of adverse cross-border impacts and the creation of a relevant institutional structure.

- E.** This Agreement is also entered into in recognition of the provisions of the Intergovernmental Agreement on the Environment dated 1 May 1992 between the Commonwealth, all States and Territories, and the Australian Local Government Association, that States use their best endeavours to establish appropriate mechanisms for ensuring cooperative management where significant adverse external effects on another State are expected and identified, and that the role of government is to establish the policy, legislative and administrative framework to determine the permissibility of land use, resource use or development proposals having regard to the appropriate, efficient and ecologically sustainable use of natural resources, and to provide for the consideration of regional implications where proposals for the use of a resource affect several jurisdictions.
- F.** The provisions of this Agreement are consistent with the Council of Australian Governments' National Water Reform Framework and the Natural Heritage Trust Partnership Agreements.

THE PARTIES AGREE AS FOLLOWS:

Purpose

- 2.1 The purpose of this Agreement is to provide for the development or adoption, and implementation of Policies and Strategies concerning water and related natural resources in the Lake Eyre Basin Agreement Area to avoid or eliminate so far as reasonably practicable adverse cross-border impacts.

Objectives

- 2.2 The objectives of this Agreement are:
- (a) to provide a means for the Parties to come together in good faith to achieve the purposes of the Agreement;
 - (b) to define a process and context for raising and addressing water and related natural resource management issues in the Lake Eyre Basin Agreement Area that have cross-border impacts, particularly those related to water quantity and quality, and flow regimes;
 - (c) to establish institutional arrangements for the development or adoption of Policies and Strategies and for the adoption of any relevant management plans established by a State;
 - (d) to provide for each of the Parties, so far as they are able within their respective jurisdictions, to progress the implementation of Policies and Strategies developed or adopted under this Agreement and to make management decisions and allocate resources accordingly;
 - (e) to provide a mechanism to review Policies and Strategies;

 - (d) that the water requirements for ecological processes, biodiversity and ecologically significant areas within the Lake Eyre Basin Agreement Area should be maintained, especially by means of flow variability and seasonality;
 - (e) that flooding throughout the catchments within the Lake Eyre Basin Agreement Area is beneficial in that it makes a significant contribution to pastoral activities as well as flood plain ecosystem processes;
 - (f) that the storage and use of water both within and away from watercourses, and the storage and use of water from associated ground water, are all linked and should be considered together, and that water resources throughout catchments within the Lake Eyre Basin Agreement Area should be managed on an integrated basis;
 - (g) that precautionary approaches need to be taken so as to minimise the impact on known environmental attributes, and reduce the possibility of affecting poorly understood ecological functions;
